JoikuSpot Light 2.00 Disclaimer

PRIVACY POLICY AND LEGAL NOTE

By accepting these terms you are allowed to use the JoikuSpot Light Software. If you do not accept these terms you are not allowed to use the JoikuSpot Light Software.

Joikusoft is not liable for any misuse, mal-functionality, compatibility or use cost of or inability to use the JoikuSpot solution. JoikuSpot Light software comes on “as is” basis, is freeware by nature, and there is no support of any kind provided for the use or installing of the software.

Joikusoft has not tested the software against all different types of device configurations and users should only use the JoikuSpot Light at their own risk and at their own cost.

This software uses your phone’s 3G/3.5G, EDGE or GPRS internet connection and shares it over WLAN to external WLAN devices. When you turn on the JoikuSpot client in your Smartphone, you allow sharing of your phone’s internet connection to external WLAN devices. This means that the external devices may connect to internet using your JoikuSpot as an access point and gateway to the web. All the incurring connectivity and data transfer cost is beared by the JoikuSpot client owner (=you) that shares the connection. The total use cost depends on your mobile data plan with your operator and the wireless network(s) you are using/roaming.

As the cost of all incurring mobile data traffic is beared by you, we highly recommend unlimited data plans with your wireless operator. To avoid unpleasant surprises with your operator’s mobile data bill, Joikusoft strongly recommends you to carefully familiarize yourself with all aspects regarding your mobile phones mobile data costs, both in domestic and international use contexts. If you are billed by transfer amounts per megabit or if you are using JoikuSpot while roaming abroad, the use of JoikuSpot may become very costly depending on your data plan and the operator whose 3G network you are using. Joikusoft is not liable for any type of the cost incurring as a result of the usage of the JoikuSpot. Please also be aware that even if you have an unlimited data plan and when using JoikuSpot abroad, the foreign operators typically charge you for the use of their networks on top of your monthly plan with your operator.

Use of JoikuSpot requires free registration with JoikuSoft. JoikuSoft will not rent or sell your account information to the third parties. JoikuSpot requires the application to post its client-id and cell-id and some other user, device and usage related data to a secure network server for service activation and authorization and for quality, measurement, additional services that may include advertisement and

reporting purposes. When you use JoikuSpot, you allow it to post any and all such client, user and service usage information to the network based back end system defined by JoikuSpot. You further allow JoikuSpot, at Joikusoft's option, to publish your JoikuSpot hotspot location on external web based mapping services such as GoogleMaps.

Using JoikuSpot impacts the phone battery consumption, and with some phone models the increased battery consumption may heat the phone when JoikuSpot is used continually for longer periods of time. Joikusoft is not liable for any such impact of use of the JoikuSpot.

JoikuSoft shall not be liable for any direct, indirect, incidental, special or consequential damages or costs to the user arising out of the use of or inability to use the JoikuSpot Light.
